

Think inside the square

Stool. Planter box. Drinks cooler. Display system. Fish bowl. How cool are these cubes? Introducing Luxus Light Cubes, exclusively brought to Australasia by Melbourne funkmeisters, GadgetKing. Created by German design guru Max Kistner, the illuminated cubes won the category of Light Of The Future at the 2004 European Design Competition, for their great design and energy efficiency.

Extremely durable and versatile, Luxus can be used indoors or out. You can even change their colour for that special event. Also discovered at GadgetKing is the latest from Remake Design – a modular lighting system that enables the user to build and vary shape and form. Referred to as the Lego of lighting, individual pieces snap together and can be twisted to create almost any desired shape. Available in a variety of colours, these two new products from GadgetKing are as limited as your own creative juices.
