

Remake Light

Create, construct or convert an interior with this modular lighting system, which is composed of individual 'building blocks' available in orange, pink, red, white, grey and black. Dimensions: 24 x 17cm. Each block is equipped with a 40W lamp. Referred to as the Lego of lighting — pieces snap together and have 90 degree rotation from where they were connected — you can build virtually any shape, only limited by your imagination.
